

H5P Goodies: Not yet officially released

60 Items

A collection of new or enhanced H5P content types, plugins, and code enhancements not all (yet) officially released. Install and use it at your own responsibility. No support is provided. CC0. [Text in the link descriptions are mostly mine. (Peter Baumgartner)]

WordPress Plugins

SNORDIAN's H5P Resize Pulse

 Olivertacke

H5P content inside a container that uses 3rd-party JavaScript, e.g., inside an accordion or a lightbox, often is hidden and not visible. The H5P content is there, but it gets no size from the other scripts when they're...

WordPress Plugin: SNORDIAN's H5P Resize Pulse

 WordPress.org

Provides you with a potential workaround for H5P content that won't show in tabs, accordions, lightboxes, etc.

H5P-Sharing

 Olivertacke

H5P-Sharing is a WordPress plugin that offers (a) a direct link to the content (no need to create a blog post or a page first), (b) a corresponding QR code (c) an HTML code snippet for embedding the...

otacke/h5p-sharing

 GitHub

This WordPress plugin makes sharing H5P content even more effortless. It provides for every H5P exercise three things: a direct link to your WordPress installation, (2) a QR code, and (3) an HTML code snippet to...

SNORDIAN's H5PxAPIkatchu

 WordPress.org

This WordPress plugin is a simple solution to catch 'em all, those xAPI statements that have been sent by H5P content types.

H5PxAPIkatchu

 Olivertacke

This is a plugin for WordPress that you can use to store and retrieve xAPI statements ("results") from H5P content types.

Content Types

Cornell Notes

 Olivertacke

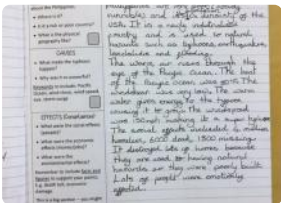

Using H5P for taking notes the Cornell way. "The Cornell method provides a systematic format for condensing and organizing notes. This system of taking notes is designed for a high school or college level student."...

otacke/h5p-cornell

 GitHub

Let your students take structured notes easily.

Structure Strip

 Olivertacke

Using H5P structure strips for writing argumentative essays and making claims using evidence. "Structure strips are a simple but powerful scaffolding tool to help kids focus on organizing their thinking and write..."

AR Scavenger

 Olivertacke

AR Scavenger features Augmented Reality. Finding physical markers on paper/websites/screens, you can trigger 3-D models or H5P interactions. Be aware: You need some knowledge for a small patch in the source co...

otacke/h5p-ar-savenger

 GitHub

This is an H5P content type that features Augmented Reality (AR). Using a device's camera, find physical markers attached to objects to trigger displaying 3D models or trigger H5P interactions.

Sort the Paragraphs

 Olivertacke

Sonny English, who runs [justasksonny.com](https://www.justasksonny.com), financed this content type. It orders sentences or even paragraphs and evaluates the outcome in two different variants: In position mode, it judges the segments' absolute...

otacke/h5p-sort-paragraphs

 GitHub

Let students sort paragraphs into the correct order.

Pick the symbols

 Olivertacke

Pick the symbols was supported financially by the German school Bubendorf. This content type presents a text passage to learners with many gaps. Some of these blank spaces lack signs, e.g., punctuation...

otacke/h5p-pick-the-symbols

 GitHub

Let your student put the correct punctuation marks into sentences.

Advent Calendar (beta)

H5P H5p

Create an advent calendar. Technically this content type does not belong in this collection because it was just released as a beta version at h5.org. – It windows hide some surprises (Christmas music videos). Still, they ca...

Advent Calendar

 Olivertacke

This is the original article where this new content type was announced by Oliver Tacke in his blog.

otacke/h5p-advent-calendar

 GitHub

Do something nice before X-mas: Create an advent calendar!

Completion confirmation

 Olivertacke

This content type asks users if they have everything understood and want to continue with the course. It sends a "completed" xAPI statement to their H5P host environment.

otacke/h5p-completion-confirmation

 GitHub

Send a custom "completed" xAPI statement that the H5P host system can catch and process.

H5P User Score

 Olivertacke

This WordPress plugin adds several shortcodes that you can put into posts and pages. The codes will be replaced by the user's previous score (absolute and a percentage) and the maximum score of an H5P content...

otacke/h5p-user-score

 GitHub

Allows you to add user score information of H5P interactions to WordPress posts and pages.

H5P Bingo

 Olivertacke

You can define a set of numbers or phrases or words, the size of the bingo board (3 to 7 columns and rows), put an optional image or video on top, and you can even set a joker in the center.

otacke/h5p-bingo

 GitHub

Game for boring conferences or meetings.

H5P Crossword

 Olivertacke

LTC (Language Training Center in Hamburg/Germany) sponsored this H5P content type. It allows you to create a pool of clues and words that will be used to generate random crosswords or have the info at fixed...

otacke/h5p-crossword

GitHub

A crossword puzzle for H5P with many features.

H5P Matching

Olivertacke

A content type from the H5P core team; almost finished. The only problem is that it has to need small pictures for faster loading. Until H5P can reduce images on the server-side, this content type will not be released...

h5p/h5p-matching

GitHub

Match two texts, or an image and a text.

H5P Geo Quiz

Olivertacke

In this German blog post, you will find a prototype of the H5P content type Geo Quiz. It allows you to answer geography questions by clicking on the assumed location on the map.

foxfabi/h5p-geoquiz

GitHub

GeoQuiz lets you create geography quizzes. The questions are answered by clicking the correct location or area in a leaflet map.

[HFP-2436] Code Review for Geography Quiz - H5P's Jira

 Atlassian

Foxfabi receives code review feedback listing things that must/should be done for the new content type to be ready for release.

foxfabi/h5peditor-coordinateselector

 GitHub

A visual coordinate selector for the H5P Editor. Wrapping leaflet JavaScript.

H5P Mark the Letters

 H5p

From this page, you can download (reuse) an example of Mark the Letters' content type. It works similarly to H5P Mark the Words but only with letters.

ZUM.de Image Hotspots Enhancement

 Zum

This is a new content type financed by ZUM.de, a German portal for teaching media. It enhances H5P Image Hotspots by integrating several other content types: Drag & Drop, True/False Question, Mark the Word...

H5P.ImageHotspotsZUM-1.9.h5p

 GitLab

This is the library file of ZUM.de Image Hotspots Enhancements. Financed by ZUM.de, a German portal for teachers, and developed by Oliver Tacke. Download the file and upload it as a library.

Code Enhancements

Dialog Cards video enhancement

 Olivertacke

This is a code enhancement for H5P Dialog Cards. It adds the possibility to use videos in addition to text and audio.

otacke/h5p-dialogcards

 GitHub

Use in addition to text and/or audio also video for the H5P content type Dialog Cards.

Enhancement for Branching Scenario

 Olivertacke

With this code addition, learners can go back the branches. Now you can use the Branching Scenario as a kind of adventure game. The code also adds the Fill in the Blank content type to Branching Scenario. At the...

Kiosk mode for Image Slider

 Olivertacke

You can now loop the pictures of Image Slider instead of stopping at the first or last image.

Add slideshow functionality: PR by otacke

 GitHub

Someone asked for a kiosk mode for Image Slider where slides would progress to the next after a configurable amount of time, similar to what digital photo frames often provide.
